

Shivansh Jaiswal

Student

BCA (AI & ML) student building AI-driven and backend systems using Java and Python. Strong foundation in OOP, DBMS, and structured data handling. Developed an NLP-based triage chatbot and a role-based academic management system with secure authentication and database integration

EDUCATION

Bachelor of Computer Applications (BCA) – AI & ML

Galgotias University, Greater Noida

09/2024 - Present

PERSONAL PROJECTS

Study Buddy (04/2025 - 06/2025)

- Developed a Java Swing-based desktop application with role-based access control for Admin and Student users, ensuring secure and structured system usage
- Implemented secure student registration and authentication using Twilio SMS-based OTP verification along with Regex-driven input validation to maintain data integrity
- Designed and implemented an Admin content management module to upload and organize PDF study materials, previous-year papers, and syllabus by course and semester
- Integrated AWS S3 for scalable, reliable document storage and MySQL for managing users, academic data, documents, and request logs via JDBC
- Built a student document search, download, and request system, with automated SMS notifications to Admin when requested resources are unavailable
- Tech Stack:** Java, Java Swing, MySQL, JDBC, AWS S3, Twilio SMS API, Regex Validation, Role-Based Access Control (RBAC)

MedicSense AI – Medical Intelligence Chatbot (12/2025 - 03/2026)

- Built a full-stack healthcare web application using Python (Flask) and SQLite to automate symptom triage and appointment scheduling
- Integrated Google Gemini API to implement natural language symptom analysis and AI-assisted severity classification
- Developed a Progressive Web App (PWA) with Service Workers for offline support and mobile-first accessibility
- Designed modular backend architecture using Flask Blueprints and implemented structured JSON logging middleware
- Implemented secure patient authentication using Firebase (OAuth 2.0)
- Tech Stack:** Python (Flask), SQLite, Google Gemini API, Firebase Auth (OAuth 2.0), HTML5, CSS3, JavaScript (ES6), Jinja2, PWA, Twilio SMS, WhatsApp API.

Bank Management System (02/2025 - 03/2025)

- Developed a Java-based console application to simulate core banking operations
- Implemented account creation, balance inquiry, deposit, and withdrawal features
- Used regular expressions (Regex) for validating user input and parsing commands
- Managed customer and account data using arrays and ArrayList collections
- Applied object-oriented programming principles including classes, objects, and encapsulation
- Tech Stack:** Java, OOP, Collections Framework (ArrayList), Regex

SKILLS

Java

C++

C Language

Python

HTML

MySQL

Data Structures

Git

IntelliJ

OOPs

DBMS

Operating Systems

CERTIFICATIONS

Hackspace Hackathon – Certificate of Participation (2025)

NPTEL Certification in Entrepreneurship – IIT/NPTEL (2025)

ACTIVITIES

Attended DevFest Noida, a developer conference focused on modern software and technology trends

Participated in Hackspace Hackathon, collaborating on a prototype project and gaining hands-on experience

LANGUAGES

English

Hindi

INTERESTS

Listening Songs

Chess
